

ESPRIT[®]

REMOTE STATUS DISPLAY UNITS

Two remote status display units are available. The ESG-2001 remote display unit has the same large graphic display as the control panel with a manual release button and an auto/manual key switch.

The ESG-2002 mini status indicator provides LED only indication for auto/manual and release imminent with an auto/manual key switch, mounted in a compact single gang ABS enclosure.

Both units use RS485 comms connections and up to 16 units can be connected on a system. If using the dual flood area control panel each remote status unit can be assigned to the specific flood area.

Technical specifications

Remote Display Dims	305 W x 205 H x 40 D (mm)
Mini Indicator Dims	87 W x 87 H x 44 D (mm)
